EDUCATION

University of California, Santa Barbara

Sep 2023 – Jun 2027

B.S. in Computer Science, Minor in Statistical Science

Santa Barbara, CA

Relevant Coursework: Data Structures & Algorithms, Distributed Systems, Artificial Intelligence, Database Systems, Computer Architecture, Advanced Applications Programming, Parallel Computing, Operating Systems, Networks

EXPERIENCE

Visa

Summer 2026

Incoming Software Engineer Intern

Foster City, CA

- Payment Products Development team, building client-facing applications that manage configuration parameters for Visa's authorization, clearing, and settlement systems using Angular, Java, Spring, and PostgreSQL

Eugo

May 2025 – Nov 2025

Software Engineer Intern

Austin, TX

- Engineered a responsive React/TypeScript web platform with 60+ reusable UI components and 15+ pages, streamlining the user experience for potential enterprise clients and reducing development time by 40%
- Migrated multiple open-source libraries from configure and CMake to Meson, modernizing build infrastructure
- Implemented CI/CD pipeline with GitHub Actions and AWS S3 deployment, reducing manual release time by 90%

Benioff Ocean Science Laboratory

Feb 2025 – May 2025

Software Engineer Intern

Santa Barbara, CA

- Programmed an interactive web-based game in React Expo to teach youth about computer vision that improved users' understanding of machine learning concepts by 40% by embedding gamified mini-modules
- Built a bounding box annotation tool in React/TypeScript to evaluate user accuracy for computer vision model training simulations, reinforcing data labeling principles and enhancing learning through real-time feedback
- Integrated at Goleta Elementary School to teach 500+ students and showcased at UN Ocean Conference in France

Memory Glass

Nov 2024 – May 2025

Software Engineer Intern

Goleta, CA

- Automated order processing workflows by creating custom Google Apps Script (JavaScript) solutions, parsing email orders and integrating them into Microsoft Access database, reducing manual workload by 10+ hours per week
- Developed automated order cancellation detection and change request alerts, reducing production errors by 70%
- Designed SQL queries to extract and export order statistics from Microsoft Access database to Excel for analysis

PROJECTS

Cycle | *React, FastAPI, BrightData, Selenium, PostgreSQL*

Oct 2025 – Oct 2025

- Developed an AI-powered returns automation platform processing 100+ receipts from Gmail, track return windows, and scrapes retailer return policies with BrightData and Selenium to reduce manual return processing by 80%
- Built async FastAPI backend processing 50+ concurrent Claude API requests, implementing 15+ REST endpoints with OAuth 2.0, PostgreSQL JSONB for per-item returnability classification across 10+ retailer formats

GachoGraduate | *React, TypeScript, Tailwind CSS, Next.js, PostgreSQL*

Jan 2025 – Jan 2025

- Engineered a drag-and-drop course planning system, enabling 4-year academic planning for 5000+ offered courses
- Integrated real-time tracking with dynamic visualization, reducing graduation requirement tracking time by 80%

AI Workout Planner | *TypeScript, React, Next.js, Tailwind CSS, OpenAI API*

Oct 2024 – Dec 2024

- Assembled a dynamic web application to generate personalized workout plans using OpenAI's API, achieving a 30% boost in user adherence to fitness goals through AI-driven recommendations and adaptive progress tracking
- Enhanced session completion rates by 15% by integrating motivational quotes and real-time session updates

TECHNICAL SKILLS

Languages: C/C++, Java, Python, SQL, JavaScript, TypeScript, HTML/CSS, R, Go

Frameworks: React.js, Node.js, Express.js, PyTorch, NumPy, SwiftUI, Django, Tensorflow, Matplotlib, Pandas

Tools: Git, Unix, Amazon Web Services, Google Cloud Platform, Postgres, MongoDB, Jupyter, Docker
